

# AlertSense

## Blue Rivers Basin Alert System (Gage, Jefferson, and Saline)

**AlertSense** is a system used to notify residents of emergency alerts, as well as non-emergency incidents that may have a significant impact to them. In order to ensure you are notified, please visit the link below to sign up and receive notifications.

## Public Safety Alerts

Receive emergency alerts from public safety alerting authorities, notifying you of situations that threaten the safety of yourself or those you care about. Public safety alerts include, but not limited to events such as crime, active shooter, imminent danger, hazardous materials, wildfire, floods, need for immediate evacuation, etc.

## Community Notifications

You can also choose to receive notifications of events in your community that, while not life-threatening emergencies, still impact your daily life and commute, such as road closures, snow emergencies, power outages, etc.

## Severe Weather Alerts

Receive advanced warning of severe weather when you or one of your locations is in the direct path of the storm. AlertSense receives feeds from the National Weather Service, automatically interprets the geographic area affected, and delivers targeted alerts immediately to app users when one of their locations falls within the impact area. You can tailor your alert settings by location, selecting the severity level for which you want to receive notifications. For example, you can choose to receive only the most severe weather warnings or all watches and advisories as well.

Our residents and visitors can now receive life-saving emergency alerts and advanced warning of severe weather directly on their Android or Apple iOS phone or tablet. You can download the free MyAlerts app today from the Google Play Store or the App Store.

Any information you share will remain private and will only be used to deliver the emergency alerts and community notifications which you subscribe to.

If you have any questions, please contact Carla Zarybnicky, Southeast Area 911 Communications Director at (402) 228-5264 or (402) 223-4080, ext. 0.
