

Water Pollution Control (WPC) Department - Sewer

The WPC Department is responsible for maintaining approximately 100 miles of sanitary sewer system for the City of Beatrice. Crews routinely jet and video the sewer lines in order to help prevent blockages.

Several improvements will be made to the Wastewater Treatment Facility over the next few years. For the latest information about the WPC Department, you may review the [Capital Improvement Plan](#) and [Rate Study](#) prepared by Olsson Associates.

The Board of Public Works takes pride in offering the lowest rates possible to our valued customers. Our customers have not had an increase in sewer rates since 2016. For information regarding our sewer rates, see our Sewer Rate Ordinance below. If you have questions regarding rates or bills under your name, please contact our
