

Energy Rebates & Incentives

The Beatrice Board of Public Works (BPW) offers financial incentives to help our customers conserve electricity and water. Upgrade your home with an energy-saving service or product and you'll receive a return on your investment. It's a great way to make positive changes with your energy and get a little something back for the effort.

Funds for the Go Green | Save Green program are available on a first-come, first-served basis beginning October 1 of each year. This program is not available to customers with a current Energy Efficiency Loan thru BPW, or customers utilizing PACE financing.
